

## EZPAY Advantage Equipment Configuration Checklist

The EZPAY Advantage application is a separate application from the transaction-based Check/Gift/Loyalty application. It is recommended that the memory of terminals that will be running Check/Gift/Loyalty with the EZPAY Advantage application be taken into consideration.

EZPAY Advantage 3/6/12 Month

TechTrex	
<b>PrimeTrex One ("PAI-Trex One")</b>	Yes
Notes:	PrimeTrex One is an all-in-one terminal, with an in-built imager and capable of dial-up or IP communication Terminal can only autoseettle one application
VeriFone	
<b>Omni 3730 / 3730LE / 3740 / 3750</b>	EC6004i / EC6005i EC6004f/EC6005f EC6014i/EC6014f EC6011* EC7011* EC7014f
Notes:	* <b>RDM EC6011 and EC7011 have no modem and require the terminal to have an IP connection to upload</b> 3730 model does not support dual comm (IP) and has limited memory 3730LE model does not support dual comm (IP) and is limited to a single application If integrating credit, debit, check and gift/loyalty, terminal must be 4 MB minimum, preferably 6 MB Imagers require an analog phone line for the uploading of images unless uploading via IP. IP or Dual Comm needed if loading an IP Application
<b>Vx510 / Vx510LE / Vx570 / Vx610</b>	EC6004i / EC6005i EC6004f/EC6005f EC6014i/EC6014f EC6011* EC7011* EC7014f
Notes:	* <b>RDM EC6011 and EC7011 have no modem and require the terminal to have an IP connection to upload</b> Vx510LE model does not support dual comm (IP) and is limited to a single application If integrating credit, debit, check and gift/loyalty, terminal must be 4 MB minimum, preferably 6 MB IP or Dual Comm needed if loading an IP Application Imagers require an analog phone line for the uploading of images unless uploading via IP. Vx610 wireless capability is dependent on the SIM card installed and may require a physical analog telephone or IP connection
<b>Vx520 / Vx670</b>	EC6004i / EC6005i EC6004f/EC6005f EC6011* EC7011* EC6014i/EC6014f EC7014f
<b>IMPORTANT:</b>	Security certificates are required before downloading (unless standalone) Certificates must be provided by the terminal owner (first downloader) before installation can occur Certificates remain in terminal after clearing, and must be removed by the originator by special process
Notes:	* <b>RDM EC6011 and EC7011 have no modem and require the terminal to have an IP connection to upload</b> IP or Dual Comm needed if loading an IP Application Imagers require an analog phone line for the uploading of images unless uploading via IP. Vx670 wireless capability is dependent on the SIM card installed and may require a physical analog telephone connection
